A Primer of Geometrical Optics

Ada Lumen

Synthetic test edition: not a real book

Chapter 1 Rays and Refraction

1.1 Snell's law

This paragraph is synthetic text written for the myLibrary test corpus. It has no meaning beyond giving the reader, the search index and the notes panel something to work with. Words such as aperture, convergence, eigenvalue, recursion, membrane and archive appear so that searches find them on known pages.

1.2 Thin lenses

This paragraph is synthetic text written for the myLibrary test corpus. It has no meaning beyond giving the reader, the search index and the notes panel something to work with. Words such as aperture, convergence, eigenvalue, recursion, membrane and archive appear so that searches find them on known pages.

$$\frac{1}{f} = \frac{1}{s} + \frac{1}{s'} \tag{1.1}$$

$$n_1 \sin \blacksquare = n_2 \sin \blacksquare \tag{1.2}$$

Table 1.1 Two synthetic glasses

Glass	n_d	V_d
Crown (synthetic)	1.517	64.2
Flint (synthetic)	1.620	36.4

Chapter 2 Imaging

2.1 Aperture stop

This paragraph is synthetic text written for the myLibrary test corpus. It has no meaning beyond giving the reader, the search index and the notes panel something to work with. Words such as aperture, convergence, eigenvalue, recursion, membrane and archive appear so that searches find them on known pages.

2.2 Pupils

This paragraph is synthetic text written for the myLibrary test corpus. It has no meaning beyond giving the reader, the search index and the notes panel something to work with. Words such as aperture, convergence, eigenvalue, recursion, membrane and archive appear so that searches find them on known pages.

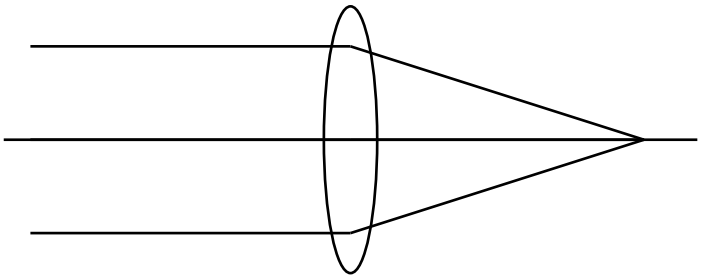

Figure 2.1 A thin lens bringing parallel rays to a focus.

Chapter 3 Aberrations

3.1 Spherical aberration

This paragraph is synthetic text written for the myLibrary test corpus. It has no meaning beyond giving the reader, the search index and the notes panel something to work with. Words such as aperture, convergence, eigenvalue, recursion, membrane and archive appear so that searches find them on known pages.

3.2 Chromatic aberration

This paragraph is synthetic text written for the myLibrary test corpus. It has no meaning beyond giving the reader, the search index and the notes panel something to work with. Words such as aperture, convergence, eigenvalue, recursion, membrane and archive appear so that searches find them on known pages.
